"What we learn with pleasure, we never forget."

- Alfred Mercier

Sometimes I think that I have the greatest job in the world, as I get to see the pleasure that comes with learning daily. It may be that look on a student's face when he or she finally gets something and the "light bulb" goes on, the joy of a good test grade, and the confidence of working with a partner on a project or the comfort of cuddling up with a good book in the library.

Parents, I thank you for the joy and privilege of working with your children.

This year we have accomplished many great things at SES. Our pre-K program has expanded, our teachers have put time and energy into strengthening our science and math programs and we are beginning implementation of the *Catechesis of the Good Shepherd* program. Each of these programs and many others as well have ignited that joy in learning in our kids that will hopefully stay with them throughout their lives.

It seems like school has just begun, but it's time now to begin the enrollment process for next year. In this packet you will find enrollment information from our Business Office to start the process. Please take the time to review it and get your child registered for the 17-18 school year.

St. Edward School has played an important part in educating generations of Nashville families. The strong faith-based culture, the family-like support and the emphasis on preparing students for the future has made St. Edward the place that it is. We hope that this strong tradition will continue to be part of your child's tradition as well.

Once again, thank you for the trust that you have already shown us. If you have any questions, please feel free to come and talk.

Blessings,

Marsha Wharton, Ed.D.
Principal
